

CLEANLINESS AND INFECTION CONTROL – INFORMATION FOR PATIENTS

At Limes Dental Centre we take Infection Control and cleanliness very seriously.

Staff training takes place regularly and all new members of staff are trained on Infection control.

We have practice policies and systems in place to ensure a consistent approach to decontamination and Infection control, including general cleaning.

We routinely follow the Department of Health guidelines on the prevention and control of infections and we carry out an audit every three months to ensure that we comply with current legislation. We are also inspected on a regular basis by various governing bodies.

All instruments are either single use or sterilised prior to use.

All of our equipment is maintained and tested regularly to ensure that it is in full working order. We keep records of all tests and checks that are carried out.

If you have any questions or concerns please speak to a member of staff or practice owner Deborah Cail.
